**International Economics**  
**Study Level: Bachelor /**  
**Undergraduate**

**Prof. Dr. Erdal Yalçın**  
**Language of Instruction: English**  
**ECTS Credits: 3**

**Objectives:**

This course intends to familiarize students with international economic issues. Starting with the classical trade models (e.g. Ricardo, Heckscher-Ohlin, Monopolistic Competition) students will be acquainted with several trade models explaining real trade patterns. Furthermore, monetary aspects appearing along with international trade will be accounted for in the second half of the course. Successful participants will leave the course with a broad understanding of ample topics which are discussed in daily newspapers and in multinational enterprise units.
