

Course number:
14GIB24276
14GIB24277
Introduction to IT-Security
Study Level: Bachelor /
Undergraduate

Prof. Dr. Hanno Langweg
Language of instruction: English
ECTS Credits: 3

Students will master the terms, mechanisms, and processes of IT security and can apply them in a business context. After successful completion of the course, students will know basic cryptographic mechanisms and their applications. Students will understand the effects of threats to IT systems and master appropriate measures for the protection of IT infrastructures.

This course can not be combined with "Foundations of IT Security" (14AIN42050, 14AIN42051, 14AIN42053).
